PROFESSIONAL SUMMARY

UI Developer with 4+ years of experience in building scalable and responsive web applications using Angular 17, TypeScript, and Tailwind CSS. Strong expertise in **building scalable, accessible (WCAG-compliant) UI screens, integrating REST APIs**, and delivering high-quality code following industry standards. Experience includes **Agile/Scrum, CI/CD, and deployment activities**. Recognized for strong delivery, initiative, and contribution to team success.

TECHNICAL SKILLS

Frontend

- Angular (v 16/17)
- Typescript
- HTML5
- CSS
- Tailwind CSS

Tools and Practices

- Rest API Integration
- Responsive Design
- WCAG Accessibility
- Version Control (Git)
- Agile Development
- VS Code
- AI tools For Code Optimization

Backend

Core Java

Other

Knowledge on generative AI Tools

EDUCATION

MCA, Sastra Deemed University
B.Sc. Computer Science, Ambedkar University

2021 – 2024(Online Mode)
2018 – 2021

PROFESSIONAL EXPERIENCE AND PROJECT DETAILS

- Developed UI screens using Angular 16/17 with reusable components.
- Migration of older modules to latest Angular versions.
- Created responsive screens using Tailwind CSS.
- Worked with API integrations, validations, and forms.
- Developed Reusable UI components integrated across business modules.
- Ensured 100% WCAG compliance across all UI screens, enhancing accessibility.
- Increased development speed by 25% by utilizing AI-based tools for code generation and validation.
- Led daily scrum meetings, sprint planning and tracking progress as Scrum Lead.
- Involved in deployment tasks and documentation.

Project: Career Portal Modernization

Role: Angular Developer

Tech Stack: Angular 16/17, TypeScript, Tailwind CSS, RxJS, REST APIs, Java

Duration: Aug 2021 – Present

Company: Tata Consultancy Services (TCS)

- Designed and developed multiple application screens and implemented reusable layout components to maintain UI consistency across modules.
- Built dynamic and validation-rich application forms using Reactive Forms and custom validations.
- Integrated REST APIs for jobs, user profiles, Application details and offer management with loading stages and error/ retry mechanisms
- Implemented lazy – loaded feature modules and route guards to ensure secure and scalable navigation.
- Built form-based and responsive UI screens and integrated numerous REST APIs
- Created UI responsive layouts using Tailwind CSS for desktop, tablet and mobile screen sizes.
- Participated in deployment activities, release support, and business user demonstrations.

Highlights and Achievements

- Trained new team members on Angular architecture and Tailwind UI practices.
- Delivered UI screens with scalable reusable component architecture.
- Reduced application load time by ~30% using lazy loading and optimized API handling.
